Five tips for the over-40s to get healthy - BBC News

You lose about 1 percent of muscle mass per year beginning at age 40. That makes it more important than ever to keep working those muscles once you've entered this decade of life. Keep up a steady workout regimen that keeps you strong, flexible, and able to tackle whatever the day might throw at you—physically or otherwise.

The 40 Ways to Master Your 40s | Best Life

No one can argue that coffee has its benefits either – it wakes you up, increases alertness and helps you stay focused. The problem is that when people drink too much of it – or more than 3-4 cups a day. This is not uncommon as people try to get too many things done in a day. The safe amount for most healthy adults is 300-400mg a day, which is equivalent to two 5-Hour Energy shots, one ...
