5th Edition sounds and engage in babbling. Some research has shown that the earliest learning begins in utero when the fetus starts to recognize the sounds and speech patterns of its mother's voice and differentiate them from other sounds after birth.

Language development - Wikipedia

Speech and language development begins very early, before a child says his or her first word. Early adult–infant interactions in the forms of facial expressions, vocalizations, and physical contact trigger a domino effect of speech and language acquisition and progression. Children vary in their development of speech and language, but they follow a natural progression for mastering the ...

Language Development in Children: 0 to 6 Years

Language Development. Given the remarkable complexity of a language, one might expect that mastering a language would be an especially arduous task; indeed, for those of us trying to learn a second language as adults, this might seem to be true. However, young children master language very quickly with relative ease. B. F. Skinner (1957) proposed that language is learned through reinforcement
