The Straits Of Malacca Indo

The Strait of Malacca or Straits of Malacca is a narrow stretch of water, 890 km in length, between the Malay Peninsula and the Indonesian island of Sumatra. As the main shipping channel between the Indian Ocean and the Pacific Ocean, it is one of the most important shipping lanes in the world. It is named after the Malacca Sultanate that ruled over the archipelago between 1400 and 1511, the center of administration of which was located in the modern-day state of Malacca, Malaysia.

The Straits of Malacca, Indo-China, and China (1875 ... Stretching from the westernmost corner of Malaysia to the tip of Indonesia's Bintan Island, the Malacca and Singapore straits serve as global shipping superhighways. Each year, more than 120,000...

Pirates in Southeast Asia: The World's Most Dangerous Waters The Strait of Malacca's geography makes the region very susceptible to piracy. It was and still is an important passageway between China and India, used heavily for commercial trade. The strait is on the route between Europe, the Suez Canal, the oil-exporting countries of the Persian Gulf, and the busy ports of East Asia. It is narrow, contains thousands of islets, and is an outlet for many rivers, making it ideal for pirates to evade capture.
